Please refer to the rules and policies at the beginning of this book for more information.

Preserved products should have a label on the jar with the name of the product and the date of preservation. All canned items must be exhibited in regulation canning (in size as stated in each section) with cap and ring. No other, not listed containers will be accepted.

- Judging will be done by comparison to recognized standards (scientific or research-based) of quality and safety by comparison to other exhibits to determine placings within a class.
- Exhibits will not be judged by tasting, visual inspections will be used for the most part. Jars may need to be opened, however when spoilage is suspected or differences among entries are very small.
- Fancy padded lids, fabric wraps or cozies interfere with the judging process and should not be used.
- Jams, jellies, marmalades, and preserves sealed with paraffin will not be judged; these products must be heat sealed (canned).
- Jar sizes for which there are no USDA canning recommendations will not be judged.
- All entries must have been preserved within the last year (12 months).
- If fresh produce is used, the exhibit should have been preserved within the last growing season; in no case should this exceed one year.
- Unsealed exhibits or products showing signs of spoilage will not be judged.
- Exhibits must be labeled on the jar with the name of the food, the date preserved, and the method of food preservation (**DO NOT** put participants name on the jar).
- The entry should also be accompanied by the recipe used and source (such as USDA or BALL). It is important that the **RECIPE IS FROM A RELIABLE RESEARCH-BASED SOURCE**. (A judge needs to know if the proper amount of citric acid, lemon juice, or vinegar has been added to canned tomatoes, for example. The judge also has to know whether certain foods have meat, low acid vegetables, starches, etc. added).
- Dried foods may be handled by judges to determine stage of doneness.
- Dried foods should be displayed in appropriate storage containers (glass jars with rust-free lids, heavy-weight plastic food-quality bags, vacuum-sealed plastic bag).
